

How to increase realization from your tax engagements

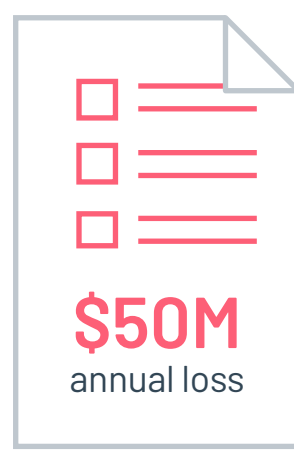

Current timekeeping methods lead to unreliable data and lost revenue

Accounting firms that rely on simple, online timekeeping tools risk delays in time recording, unreliable data, and reduced realization.

Lost hours add up fast

Consider an accounting firm with 3,000 employees. A single unrecorded hour per week per employee, at a rate of \$335 per hour, represents a \$50 million difference in estimated cost versus actual cost of client engagements.

3,000
